**DUNVOLT
INDUSTRIES**

GLAD TO SEE **YOU**

We, **Dunvolt Industries** are an experienced Industrial Automation and Motion Solutions provider with a mission to simplify the complexities and risks associated with Industrial procurement. We serve a spectrum of industries with best performing products for the most demanding applications.

About Dunvolt Industries

Enabling Customer Success

Our Product Offering

- *Industrial Motors*
- *Variable Frequency Drives*
- *Mech. Power Transmission*
- *Measurement & Analytics*

WE'RE

VALUE FOCUSED
CUSTOMER CENTRIC
MISSION DRIVEN

We are an emerging provider of industrial automation and motion products. We serve industrial businesses with best performing machines, learning them inside and out to ensure your experience with us is second to none.

Our core business focuses on export of spare parts, obsolete hard-to-find parts and individual equipment packages.

We are forward thinking, passionate about technology, always looking to improve and find new ways of exceeding your expectations.

SOLUTIONS THAT **WORK**

THE PRODUCTS YOU NEED

We supply best in class products from tier A brands like Siemens, Krohne, ABB, Emerson, Hugo Tillquist and many more. Our portfolio includes Induction Motors, Frequency Drives, Power Transmission System, Industrial Automation and Instrumentation products.

TECHNICAL SUPPORT & COMPETENCY

We possess a deep understanding of the products we offer. Our teams are multi-product specialists trained continuously on new technologies and products.

EASE OF DOING BUSINESS

On our mission to cut the complexities, we can be flexible with our approach and yet maintain unmatched service quality. We are passionate, reliable and agile.

CUSTOMIZED TO YOUR **BUSINESS NEEDS**

Our expertise lies in offering solutions to a variety of applications across different industries.

Industries we serve

Oil & Gas

Chemical

Power

F & B

Mining

Pulp & Paper

Water

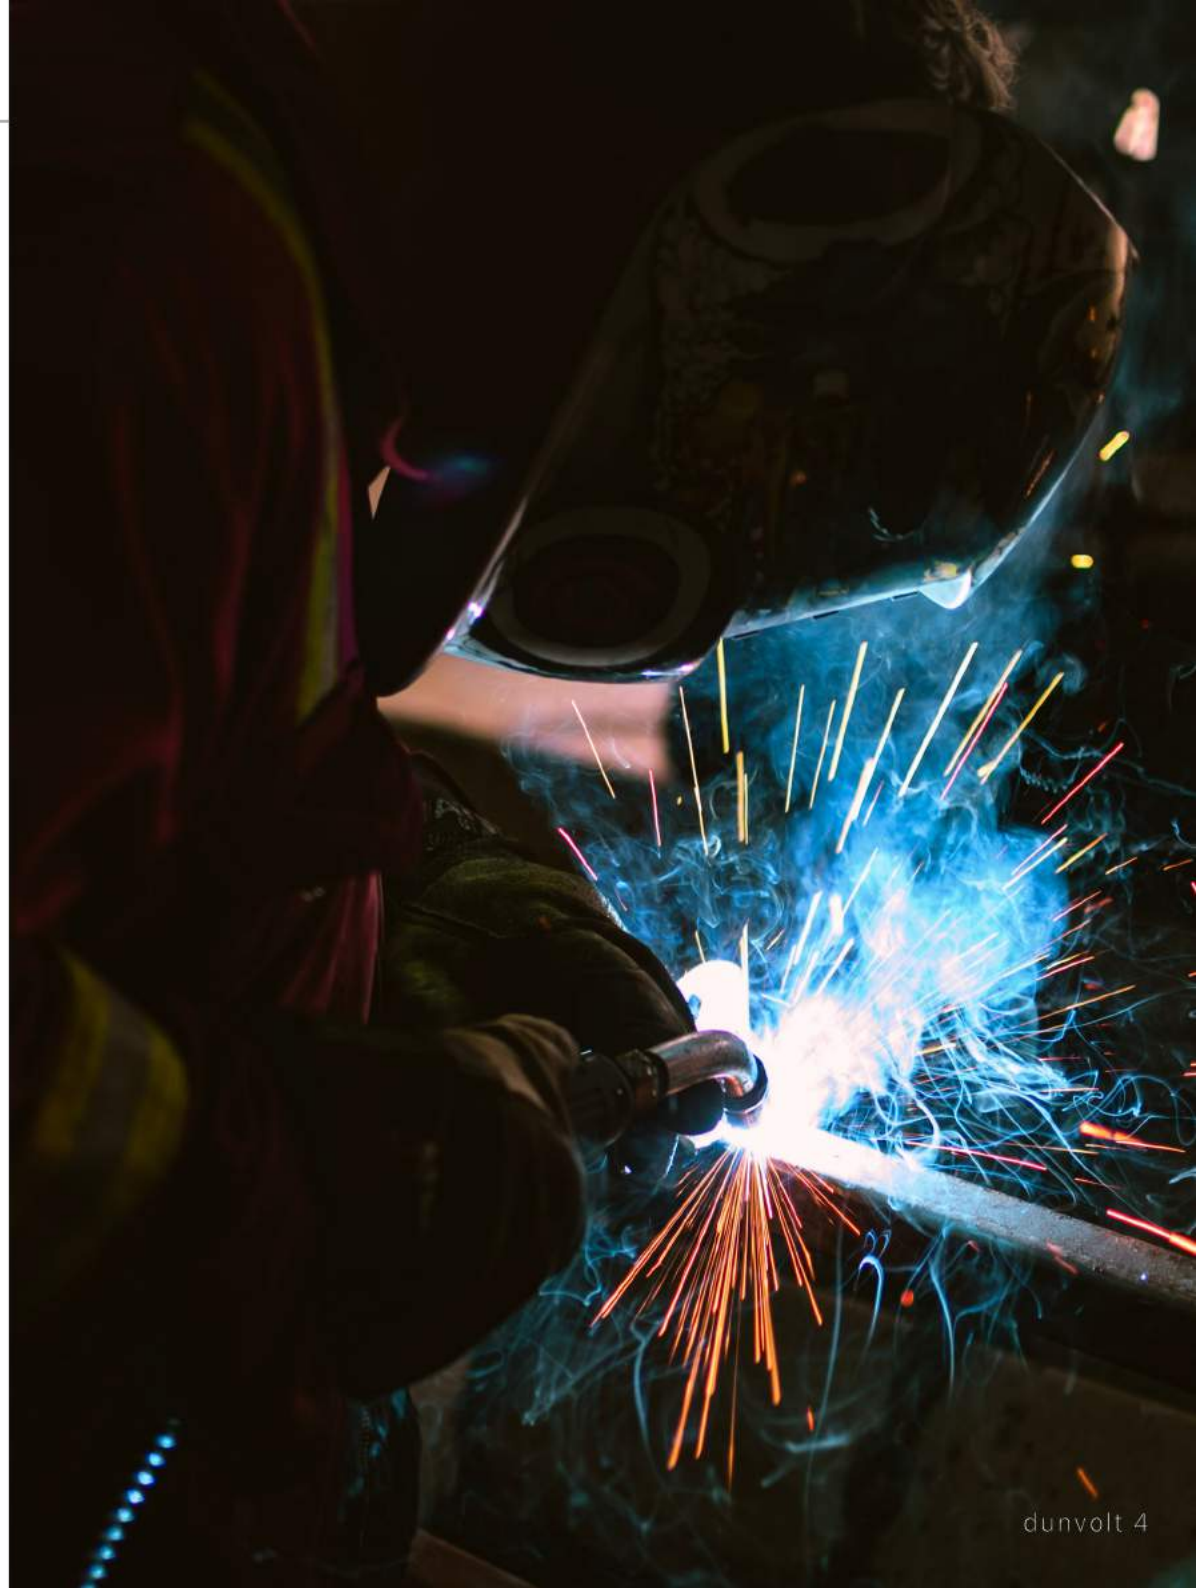

Engineering

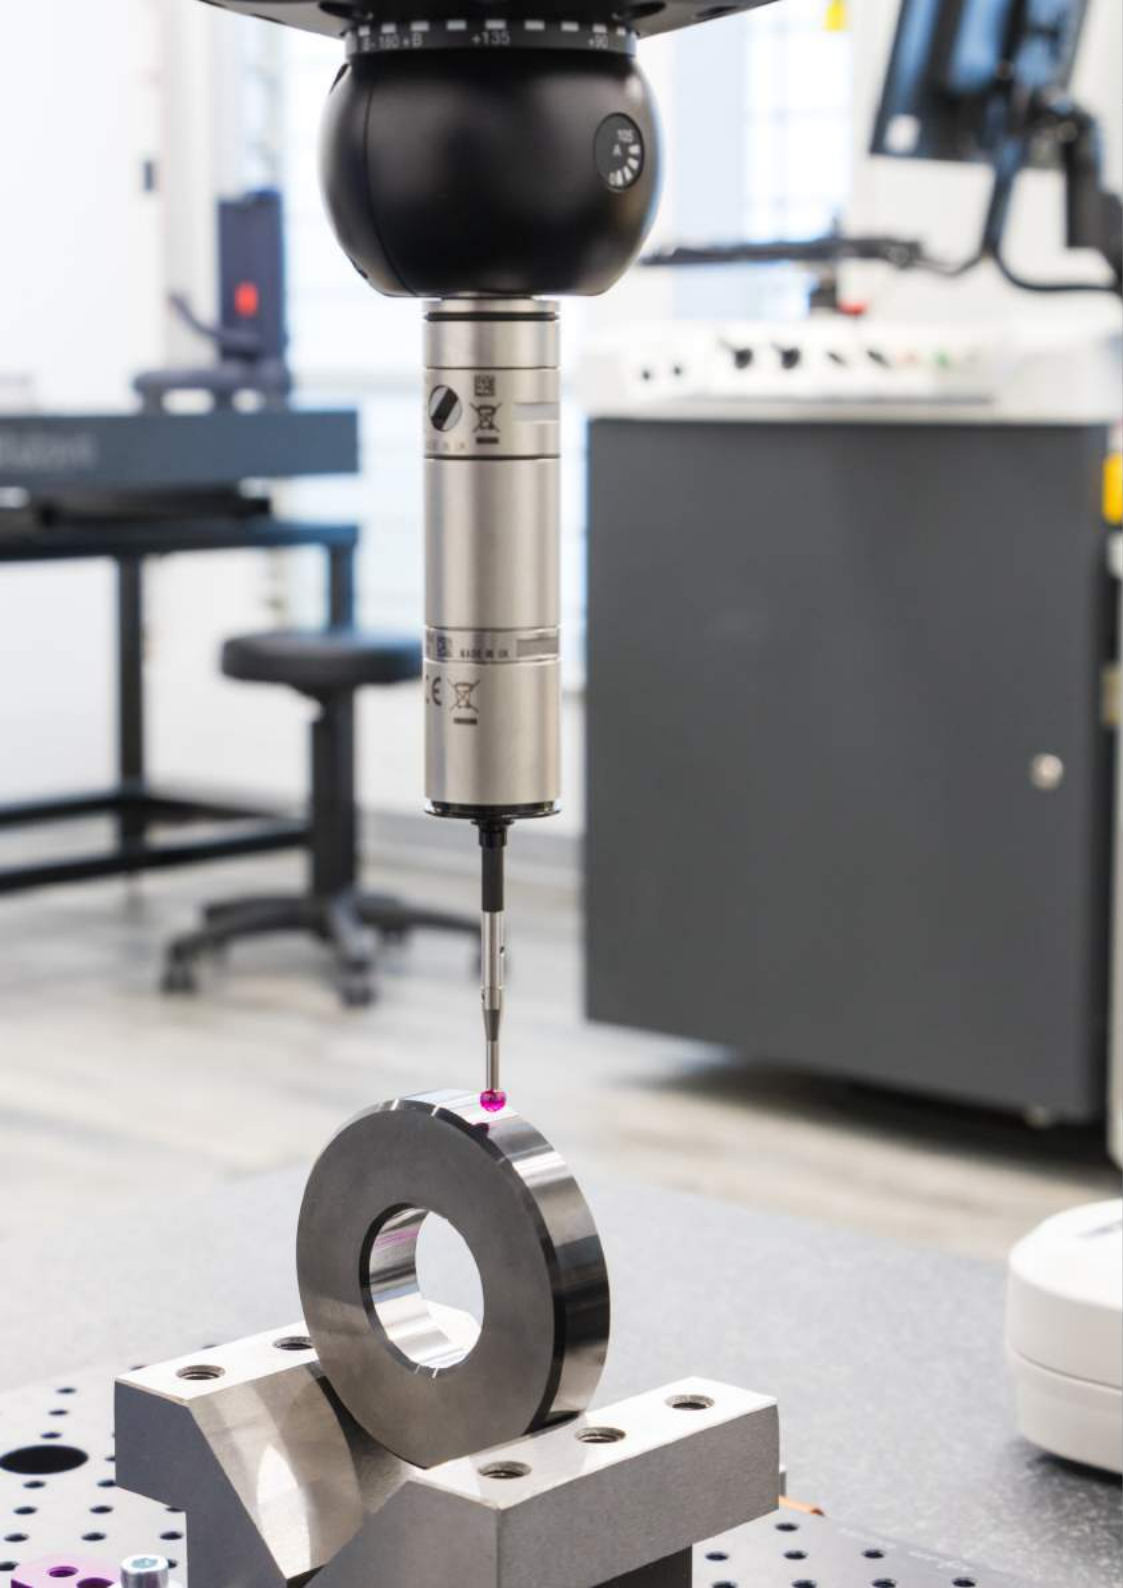

Iron & Steel

Petrochemical

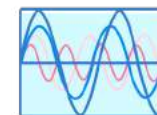

DRIVEN FOR **EXCELLENCE**

To make our customers successful we address multiple needs. We have gained in-depth knowledge about Induction Motors, Variable Frequency Drives, Mechanical Power Transmission Products and Instrumentation Products. Apart from products, we can deliver solutions built around these products to help you reduce downtime and increase process efficiency.

Products & Services

INDUSTRIAL MOTORS

INDUSTRIAL **MOTORS**

Our portfolio includes induction motors from Toshiba, TMEIC, GE, Wolong, ABB & Baldor. Besides, we have capabilities to provide inter-brand matching functional replacements for any brand of your existing motors.

- DC to AC Conversion
- Aftermarket Modification
- Foot / Flange Conversion
- Upgrade for Energy Savings
- Install Base Evaluation Survey
- Motor + Drive package upgrade

TAILORED SOLUTIONS

- General Performance
- Flameproof
- Dust Ignition Proof
- Increased Safety
- Smoke Extraction
- Brake Applications

IEC MOTORS

- General Purpose
- IEEE-841 Motors
- Explosion Proof
- Pump Duty
- Washdown Duty
- Customized Motors

NEMA MOTORS

- End Shields
- Flange Kits
- Cooling Fans
- Fan Covers
- Encoder Kits
- Conversion Bases

SPARE PARTS

VARIABLE FREQUENCY DRIVES

VARIABLE FREQUENCY DRIVES

Our portfolio includes industrial drives from Toshiba, TMEIC, GE, Siemens and ABB. Our team can guide you in sizing a retrofit solution for old drives with minimum modification.

- DC to AC Conversion
- Aftermarket Modification
- Upgrade for Energy Savings
- Install Base Evaluation Survey
- Motor + Drive package upgrade
- Repair and Maintenance Kits

TAILORED SOLUTIONS

- Standard Performance
- High Performance
- Industry Specific
- Servo Applications
- Legacy Drives (Limited)

LV DRIVES

- IGBTs
- Thyristors
- Thyristor Firing Boards
- Control / Interface Cards
- Cooling Fans

- Capacitor Banks
- EMC Filters
- Mounting Kits
- Keypads
- Software

DRIVE SPARE PARTS

A close-up photograph of a mechanical power transmission system, featuring a large cast-iron housing and a pulley. The entire image is overlaid with a semi-transparent red filter. The text 'MECH. POWER TRANSMISSION' is centered in white, bold, uppercase letters. The cast-iron housing has embossed text: 'DOB' at the top, 'E' on the right, and 'TAG 6307H' at the bottom. A pulley is visible on the left side of the housing.

MECH. POWER TRANSMISSION

MECHANICAL **POWER TRANSMISSION**

With an expansive portfolio of electrical and mechanical products, a team of specialist and years of expertise, we offer complete, packaged proposals for quick delivery of assembled products that increase reliability and improve productivity while maintaining safe operations.

CONVEYOR COMPONENTS

The image shows a complex industrial environment, likely a power plant or refinery, with a strong green color overlay. In the center, there are two large, circular pressure gauges or sensors. The left gauge has a white face with a needle and is surrounded by a green ring with the text "ATMOSPHERE" and "KEEP TIGHT WHEN CIRCUIT OPEN". Below the gauges are several cylindrical components, possibly valves or actuators, connected by a network of pipes and hoses. The background is filled with more industrial structures, including beams and pipes, all bathed in the same green light. The text "MEASUREMENT & ANALYTICS" is superimposed in white, bold, sans-serif font across the middle of the image.

MEASUREMENT & ANALYTICS

MEASUREMENT & **ANALYTICS**

We supply a wide range of instrumentation products including flowmeters, pressure transmitters, temperature and level instruments, actuators, valves, controllers and positioners. Brands include ABB, Tillquist, Siemens, Krohne, Teledyne, and Endress Hauser.
